1. About CyberLess

a. Mission

Cyberless is an NGO dedicated to protecting children's physical and psychological well-being online while safeguarding their right to access information, privacy, and anonymity. Our mission is to create a safe and secure digital environment for children. We work hand in hand with voluntary scientists to develop psychological tests that identify potential non-substance addictions and provide alternative solutions. With our guidance, children can navigate the online world with confidence and peace of mind. Together with our Voluntary Scientists and Supporters, we have been creating this Association since three years now. On the 27.10.2023, we decided that it is time to register our efforts as an official association. Our Founder Evrim Eftelya Yayan, together with our Co-President Serap Helvacı and our Physical Security Expert Emre Can Zereyak have registered the Association finally on the 18th of January 2024 in Oberentfelden, Aargau Switzerland.

b. Services

Agreed on all the Services CyberLess is providing between the CyberLess Associations Members & interested parties.

WHAT IS THE PROBLEM WE ARE TRYING TO SOLVE?

We explain risk factors for non-substance addictions and show protective factors and alternatives. In this way, we guarantee people's physical and mental health without endangering their rights to information, anonymity and privacy.

HOW DO WE CONTRIBUTE TO THE SOLUTION?

Together with international volunteer scientists, we are writing a new standard based on ISO27k - we call this the CyberLess Standard. At the same time, with the help of educators and psychologists, we have prepared psychological tests that are suitable for every brain type. These tests help us keep an eye on the people we protect and provide leadership. Once we have found an alternative to all risk factors, we call it a positive challenge. We ask someone in the club to be a mentor and pursue this "dream" or "alternative" together and act as a role model. For example, if a child wants to sing, we accompany the child and sing together for a while until he can do it on his own. This is often enough to bring about positive change. More information on www.cyberless.org .

CyberLess KAHU's: Someone who is receiving Services from CyberLess

CyberLess KAHUANA's: Someone who is providing Services as part of CyberLess.

2. CyberLess Registration & Requirements Analysis

a. CyberLess Registration

All interested parties can register through the registration talon, which will be online soon.

b. CyberLess Requirements Analysis

Our Requirements Analysis, gives us an idea about how to support you, while you support us in our voluntary work.

3. CyberLess Yearly Check-ups

All interested Members are allowed to do the CyberLess Test with a trained KAHUANA until the Application is online. Current KAHUANA's: Evrim Eftelya Yayan, Serap Helvaci, Emrekan Zereyak, Niurka Lateran Santos

4. Subject Matter Expert Groups

The Following Subject Matter Groups will be built to discover how we can improve our services to reach our mission.

"CyberLess Digital", "Creating Alternatives", "Pedagogy & Psychology", "Physical & Digital Security", "Social Pedagogy & CyberLess International", "CyberLess Partnerships & Projects"

CyberLess Switzerland, 18.01.2024, Oberentfelden
